

AeroEx GmbH is a Swiss-based company offering a wide range of services with a particular focus on delivering consultancy and support services to companies in the aviation industry. AeroEx was established to provide aerospace organizations with services and products related to regulatory compliance.

Our experts are working worldwide and compile individual and innovative solutions. We support our customers in implementing and realizing international aviation standards, and as third-party experts, we combine our strengths in various sectors of the aviation and aerospace industry.

To further expand our activities, we are currently looking for an experienced and performance-motivated

Compliance Monitoring Manager (f/m)

to join our team at the company headquarters permanently.

The following tasks are performed within customer projects:

- Taking over the function as an auditor, safety, or compliance manager
- Ensure that all activities within the scope of regulatory approvals are correctly carried out under the supervision of the responsible manager of the respective functional area
- Responsibility for ensuring that the safety and compliance management system is implemented correctly, maintained, continually reviewed, and improved
- Performing internal and external audits and inspections
- Process optimization within the management system
- Communication with the relevant national and international authorities
- Monitoring of suppliers
- Assistance with the creation and revision of manuals
- Technical analysis and implementation tasks in projects
- Participation and support for internal and external projects

Your qualification:

- ATPL, a degree in aeronautical engineering or comparable knowledge and abilities gained through professional training and experience in the aviation business
- Several years of professional experience with a business aviation or airline operator in the area of flight operations, airworthiness Organization (CAMO), or MRO (Part-145)
- Qualification as an aviation auditor
- Good knowledge of national and international aviation safety regulations, in-depth knowledge of Commission Regulation (EU) No 965/2012 on air operations (AIR OPS), Continuing Airworthiness Regulation (EU) No 1321/2014 Annex I (Part-M/CAMO), and II (Part-145)
- Knowledge of international industry standards (IS-BAO, IS-BAH, IOSA, and ISAGO)
- Experience in project management, compliance monitoring, and safety management
- Distinct customer and service orientation
- Able to work independently, highly motivated, and committed
- Excellent team and communication skills
- Mobility and willingness to travel
- Highly articulate and good oral and written German and English communication skills (Spanish or French language are an advantage)

We offer:

- A fascinating, future-oriented job, dealing with domestic and foreign customers
- Team-oriented work in an innovative environment
- Flexible working arrangements
- Possibility to work in Home-Office
- A competitive salary and benefits package
- Professional development and training opportunities
